Plans for Switzerland-wide WiMAX network

WiMAX Telecom wants to start rolling-out a nationwide WiMAX network in Switzerland before the end of 2005. WiMAX Telecom has already acquired a nation-wide WiMAX license in Austria. The former CEO of Telekom Austria and Ericsson Austria Werner Kastzler and founder of surfEU, RSLCom Austria and air PAGE Dov Bar Gera are the founders of WiMAX Telecom. The WiMAX network roll-out in Austria will start in the middle of 2005, with further expansions into Eastern Europe. Dov Bar Gera said that the Swiss network roll-out depends on the Swiss federal office for communication Bakom. (Source: Telecompaper) (Switzerland)
